HOW REAL ARE SELF DRIVING CARS AND WHAT DOES IT MEAN?

- Tesla fully autonomous cars ready by 2018 and approved for full driving by 2021.
- Uber and Volvo have agreed to a $300 million alliance to develop driverless cars. The cars will be hitting the streets of Pittsburgh in August for testing.
- Google's self-driving car project working on a 2020 deadline. The cars have driven over 1.8 million miles in autonomous mode as of July.
- Toyota driverless cars ready by 2020. In November, Toyota invested $1 billion in artificial intelligence and robotics to help make that goal a reality.
- BMW is also committed to releasing an all-electric car with the autonomous capabilities in late 2021 as part of its Project i20. By 2025, the Project i20 will be fully autonomous.
Full-time jobs have decreased by 1900 a month since 2010, while an average of 1100 part-time jobs have been created a month.
